LOCK UP WITH LOCKWOOD

**HOME
LOCKING
SOLUTIONS**

One of the most important items in your new home are the external door locks as they provide protection for your new property, possessions and family.

We believe that you should feel free to enjoy your new home with the confidence and piece of mind of knowing that your property is secure from the moment your builder hands over the keys.

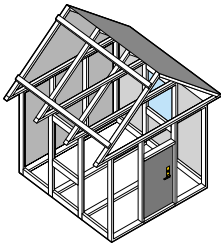

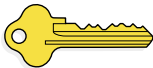

That's why we developed Lockwood's **Home Locking Solutions**.

Home Locking Solutions is a package of locks for all external door types that conveniently operate on the same key. Front doors, laundry doors, patio doors, screen doors and even padlocks for your shed or gate will all work on the same key from the moment you move in.

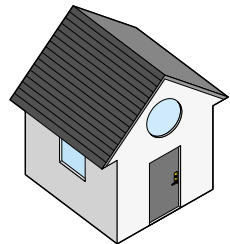

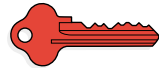

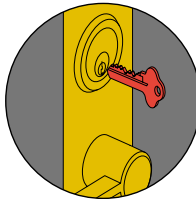

Another great feature of Lockwood's **Home Locking Solutions** service is that the cylinder in the locks can be construction keyed. This feature allows the builder and their sub-contractors to access the home during construction via a special key, called a construction key. However, when your home is complete and your builder provides you with your new key, insertion of your key into the door locks for the first time changes the internal configuration of the cylinder. This disables the builder's construction key forever and the builder and sub-contractor construction keys will never access your locks again.

Construction key used when home being built.

Home owners key disables the construction key once home is finished.

In addition to single key convenience and better home security, Lockwood's **Home Locking Solutions** also saves you time and money because you do not have to change your locks or get them re-keyed after you move in.

For piece of mind for your new home, speak to your builder about Lockwood's **Home Locking Solutions** service.
